DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-52 and 58, drawn to a system for searching for data in a file sharing system, classified in class 713, subclass 201.
 - II. Claims 53-55, drawn to a system to search and attack of a file sharing system, classified in class 709, subclass 223.
 - III. Claim 56, drawn to a system to detect a distribution pattern for remote analysis, classified in class 709, subclass 224.
 - IV. Claim 57, drawn to an element for scanning a network via port connections, classified in class 709, subclass 225.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as to search nodewise to check if a file sharing system includes predetermined data. Invention II does not require this specific type of search, and includes an attack. See MPEP § 806.05(d).
3. Inventions I, III and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are different ways to monitor a network.

4. Because these inventions are distinct for the reasons given above and the search required for each group is not required for any other group, restriction for examination purposes as indicated is proper.

5. Should applicant elect Group I, this application will contain claims directed to the following patentably distinct species of the claimed invention:

Different signature content in claims 7-12.

Different signature content in claims 20-24.

Different signature content in claims 32-37.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution from each group on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Anthony Castorina on 1/18/2005 to request an oral election to the above restriction requirement, but the examiner's message was not returned, and thus did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

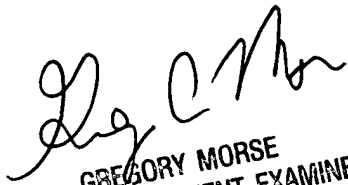

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Lipman whose telephone number is 571-272-3738. The examiner can normally be reached on 7:00 - 4:00 (M-Th).
